

SAMAD SHAIKH

Software Engineer | Full-Stack Developer | AI & LLM Integration Specialist

+91 8291190117 • sxmx.1825@gmail.com • [Bandra, Mumbai 400051](#) • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Versatile and impact-driven **Software Engineer** and **AI Integration Specialist** with extensive experience in the architectural design, development, and deployment of enterprise-grade software solutions. Demonstrates expertise in the integration of high-performance **Full-Stack** applications, utilizing Python and React 19, with advanced **Applied Generative AI** technologies. Proficient in leveraging **Google Gemini**, Retrieval-Augmented Generation (RAG) frameworks, and complex prompt engineering to establish autonomous workflows and intelligent data architectures, such as real-time financial advisory systems and roadmap generators. Proven track record across the SDLC in delivering scalable, fault-tolerant frameworks. Expert in maintaining high data integrity, SOLID principles, and robust AppSec standards. Committed to generating business value by transforming complex requirements into reliable, performance-optimized technical assets.

TECHNICAL SKILLS

Core Languages & Polyglot Skills: Python (Asyncio), C++, Java, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Next-Gen Frontend Engineering: React 19, Next.js, Vite, Tailwind CSS, State Management (Zustand/Redux), Framer Motion
Distributed Backend & API Architecture: Tornado, FastAPI, RESTful API Design, Microservices, Asynchronous Programming
Applied GenAI & Intelligent Systems: Google Gemini (Vertex AI), LLM Orchestration, RAG Frameworks, Production GenAI Workflows.
Core AI / ML Foundations: Predictive Analytics, Data Preprocessing, Model Evaluation, Feature Engineering, ML API Integration
Data Engineering & Architecture: PostgreSQL, Advanced Relational DB Design, ETL Pipelines, Real-time Sync, Database Optimization
Cybersecurity & Cloud Defense: Application Security, Identity & Access Management, Secure Coding Practices, Data Encryption
Cloud Infrastructure & DevOps: AWS, Microsoft Azure, Google Cloud, Docker Containerization, Automated CI/CD Pipelines, Git/GitHub
Business Intelligence & Analytics Solutions: Power BI, Enterprise Data Analytics, Advanced Excel Modeling
Methodologies & Engineering Practices: Agile/Scrum, SDLC, OOP & Design Patterns, Technical Documentation

WORK EXPERIENCE

Software Developer Intern — AI & Full-Stack | Arova Technologies, Mumbai July 2024 – Oct 2025

- Designed and developed full-stack Python + React applications end-to-end, applying OOP principles and SOLID design patterns to produce clean, production-grade codebases used by real teams daily.
- Integrated LLMs into enterprise systems to automate content pipelines, enhance reporting capabilities, and deliver AI-driven decision-support directly analogous to integrating LLMs into financial governance tooling.
- Collaborated across cross-functional teams to gather ambiguous requirements, produce technical specs, and iterate rapidly in agile sprints maintaining a risk-and-control mindset on data integrity and system reliability.

Data Analytics Specialist | Freelance, Mumbai Sep 2022 – Jul 2023

- Delivered data entry, cleaning, QA, and structured reporting across a sustained 10-month independent engagement; identified and resolved systemic data integrity errors that improved downstream analytics accuracy for multiple clients.
- Developed advanced Excel skills (pivot tables, VLOOKUP, data validation, conditional formatting) building a practical foundation in data management directly applicable to enterprise analytics and governance tooling.

KEY PROJECTS

PriMaX Hub — AI-Powered Multi-Module SaaS Application

Stack: Python | React 19 | Vite | Supabase PostgreSQL | Google Gemini AI (Vertex AI SDK) | Framer Motion | Recharts

- Designed and shipped a 4-module SaaS platform (Career, Finance, Productivity, Mindset) running on a unified Supabase PostgreSQL database.
- Integrated Google Gemini LLM via Vertex AI SDK across three features: AI Roadmap Generator, domain-specific Mock Interview engine, and a real-time Financial Advisor.
- Built a live spending analytics dashboard using Recharts visualizations, Supabase real-time subscriptions, and AI advisory overlays.

MockMate AI — AI-Powered Interview Practice Platform

Stack: React | TypeScript | Node.js | MongoDB | Gemini Pro | Tailwind CSS

- Designed and built an end-to-end AI mock interviewer platform leveraging the Gemini Pro API to conduct automated, domain-specific job interviews.
- An advanced resume parsing systems to assess candidate qualifications, measure JD alignment, & detect critical skill deficiencies.
- Established comprehensive evaluation frameworks to critique interview responses for technical precision and linguistic fluency, delivering automated, actionable insights.

Planora — Social Media Content Scheduler & Pipeline Planner

Stack: React | Zustand | Supabase | Tailwind CSS | Vercel

- Developed a high-performance content planner that coordinates social media scheduling, drag-and-drop calendars, and posting pipelines on a unified UI.
- Implemented Zustand for lightweight, reactive state management, reducing rendering latency during heavy calendar manipulations.
- Configured a Supabase back-end integrated with PostgreSQL to store media assets and metadata with optimal schema constraints.

WebLens — Developer Accessibility & Page Speed Analytics Tool

Stack: React | PageSpeed API | Tailwind CSS v4 | Recharts | Vite

- Built an analysis utility hooking in Google's PageSpeed Insights API to audit web performance, accessibility, SEO, & best practices.
- Designed interactive dashboards using Recharts to visualize Core Web Vitals, speed index, and resource bottlenecks.
- Optimized data parsing pipelines using React Async Hooks, ensuring a fully responsive interface for complex API audit responses.

LegalEase — AI-Powered Legal Contract Analyzer SaaS

Stack: React | FastAPI | Python | spaCy | Hugging Face Transformers | Tailwind CSS

- Developed AI legal SaaS to simplify clauses, flag compliance risks, and translate jargon.
- Built FastAPI backend using custom spaCy NER models for contract parsing.
- Leveraged Hugging Face transformers for automated audits of high-risk indemnity and liability clauses.

SmartMeet — AI Meeting Summarizer & Task Planner

Stack: React | FastAPI | Python | spaCy | TypeScript | Tailwind CSS

- Shipped an AI assistant that processes meeting transcripts, auto-extracts key discussion topics, and generates summary checklists.
- Integrated spaCy NLP models to automatically detect action owners, deadlines, and deliverables from raw transcript files.
- Implemented FastAPI asynchronous endpoints to handle heavy transcript data parsing pipelines.

EDUCATION

B.Sc. Computer Science | M.P.S.P.S College — University of Mumbai 2023–2026 (Expected Graduation) | CGPA: 8.25 / 10
Focus: Advanced Software Engineering and Distributed Systems.

Higher Secondary Certificate (HSC) | RD National College, Maharashtra Board 2022–2023 | Science Stream | Score: 50.00%

Secondary School Certificate (SSC) | K.E.P School, Bandra Maharashtra Board 2020–2021 | Score: 85.50%

SOFT SKILLS & CAPABILITIES

- | | |
|-------------------------------|------------------------------|
| • Analytical Thinking | • Attention to Detail |
| • Problem Decomposition | • Risk & Control Mindset |
| • Adaptive & Learning Agility | • Self-Directed Ownership |
| • Stakeholder Management | • Critical Thinking |
| • Requirement Gathering | • Initiative & Proactiveness |
| • Clear Communication | • Calm Under Ambiguity |

AREAS OF EXPERTISE

- | | | |
|--|--|---|
| • Full-Stack Application Development | • Prompt Engineering & AI Automation | • Agile Iterative Development (SDLC) |
| • Python Backend & REST API Design | • PostgreSQL & Relational DB Design | • Cloud Platforms (Azure , AWS) |
| • LLM / Generative AI Integration | • Distributed Real-Time Data Systems | • Cross-Functional Collaboration |
| • React Frontend & Component Architecture | • OOP Design Patterns & System Architecture | • Automated Reporting & Dashboard Tools |

CERTIFICATIONS & DEVELOPMENT

- Google Data Analytics Professional Certificate — *Google*
- IBM AI Developer Professional Certificate — *IBM*
- IBM DevOps & Software Engineering — *IBM*
- Microsoft Power Platform Fundamentals — *Microsoft*
- Meta Front-End Developer Certificate — *Meta*
- Google Cloud Digital Leader — *Google Cloud*
- Azure Enterprise Data Analyst Associate — *Microsoft*
- GitHub Foundations Certificate — *GitHub*
- Generative AI: Prompt Engineering — *Coursera*
- IBM Full Stack Software Developer — *IBM*
- Advanced Web Development — *Udemy Digital*
- AWS Cloud Practitioner Essentials — *Amazon AWS*
- Microsoft Azure AI Engineer Associate — *Microsoft*
- Analyzing & Visualizing Data with Excel — *edX Harvard University*
